26. Translation and Interpretation :

Multilingual services for international or diverse audiences.

Saudi Electricity Forum

We were honored to have the patronage of His Excellency Engineer Khalid bin Abdulaziz Al-Falih, Minister of Energy, Industry, and Mineral Resources, for our exhibition, which was the largest event in the field of energy and electricity in the Middle East.

We worked in collaboration with the Ministry of Energy, Industry, and Mineral Resources to attract over 5,000 participants and visitors to the event.

The fourth symposium for electrical safety experts, in cooperation with the Ministry of Water and Electricity

The Pajill team organized four seminars to improve the knowledge of specialists in the electricity sector about the risks involved in electrical installations and how to verify them. These seminars were aimed at those working in government facilities, residential buildings, and the electrical power generation, transmission, and distribution system.

International experiences of developing Electrical System

The organization of this workshop comes as a continuation of the efforts of the Ministry of Water and Electricity in the Kingdom of Saudi Arabia, its continuous keenness to achieve electrical safety, and its initiatives to find appropriate means to reduce the risks resulting from it, and to activate its role in creating appropriate legislation and regulations to assist the parties concerned with protecting electrical installations.

المنتدى والمعرض السعودي لكفاءة الكهرباء
Saudi Electricity Efficiency Forum and Exhibition

Saudi Forum and Exhibition for Electricity Efficiency

The Ministry of Water and Electricity hosted a forum and exhibition to promote energy conservation and efficient electricity use.

The third Forum of electrical safety experts

The third forum for electrical safety experts, titled "Safety in the Electrical Energy Supply System - Challenges and Solutions", will be held this year. This event is part of the Ministry of Water and Electricity's ongoing efforts to protect people and property from electrical hazards. The forum will address various forms of electricity and confirm the ministry's commitment to achieving electrical safety at all levels.

The Fourth Arab-China Energy Cooperation Conference
"Sustainable Energy for Development"
第四届阿中能源合作大会

Arab-Chinese Cooperation Forum in the Field of Energy

The Arab-Chinese Cooperation Conference is a forum that involves several parties from Arab countries and the Republic of China. Its primary objective is to strengthen the bonds of Arab cooperation with China, specifically in the field of sustainable energy development. The conference also focuses on enhancing the orientation towards sustainable development goals.

The First Gulf Conference on Laboratory Proficiency

Organizing the first Gulf Conference on Laboratory Proficiency is in line with the GCC Standardization Organization’s strategic direction of developing infrastructure for standardization and quality, which in turn contributes to the growth of trade and industry while supporting the national economy of member states. As the field of proficiency testing is relatively new in the member states and the laboratory infrastructure has yet to be organized into national or regional groups that represent laboratories and their needs, the Authority needs to meet with a representative segment of laboratories to investigate their requirements. This will help determine the priorities of member states with regard to the areas that require development.

The second symposium for electrical safety experts

The second symposium titled “Implementing Electrical Safety Requirements in Public Facilities” was held to learn from international experts and share successful experiences in raising the level of electrical safety. The goal was to provide requirements for protecting individuals and property in accordance with international technical legislation and health and safety regulations. The symposium also aimed to benefit from the mechanisms used in other countries to achieve electrical safety in public facilities.

Workshop on energy efficiency legislation for air conditioners and appliances Obligation to do so

Pajill Exhibitions and Conferences Company recently participated in a workshop on "Energy Efficiency Legislation for Air Conditioners and the Means to Enforce Them," under the patronage of His Excellency Engineer Abdullah bin Abdul Rahman Al-Husseini, Minister of Water and Electricity of the Kingdom of Saudi Arabia. The objective of the workshop was to increase awareness about rationalizing electricity consumption and reducing the waste of electrical energy, which is one of the most important tasks of the Ministry.

Organizing the office of the Gulf Accreditation Center

As part of the Saudi Accreditation Center's celebration of its achievements in the field of quality, the work team at Pajill International Company for Conference and Exhibition Organizing Services has developed the infrastructure for standardization and quality in a way that contributes to the development of trade and industry and supports the national economy in the member states of the Gulf Cooperation Council.

Organizing the International Day of Disability celebration

The work team at Pajill International Conference and Exhibition Services Company organized a celebration for the International Day of Disability titled "The Safety of Our Children". The goal of the celebration was to raise awareness about the risks faced by children. The annual celebration reflects the Kingdom's commitment to this important issue, under the leadership of the Custodian of the Two Holy Mosques, King Salman bin Abdulaziz Al Saud, and His Highness the Trustworthy Crown Prince - may God protect them. They have emphasized the importance of utilizing all available resources to serve this group that is dear to everyone's hearts, including material, scientific, artistic, and human capabilities.
